## PERSONAL PROFILE

I am a student at Universitas 17 Agustus 1945 Surabaya, majoring in Information Systems and Technology, with a deep interest in the world of programming, especially in the field of front-end development. I am ambitious to become a professional programmer who is not only technically proficient, but also able to create innovative solutions that are useful for many people. With a high spirit of learning, I continue to hone my skills and follow technological developments to realize this goal.

## EXPERIENCE

### Independent Entrepreneurs (WMK) Batch 3 Participants – Untag Surabaya

*October 2024 - December 2024*

- Participate in digital and information technology-based entrepreneurship development programs.
- Learn business strategy, digital innovation, and business management to build an IT-based startup.
- Collaborate in teams to design and develop applicable digital solutions.
- Gain practical experience in managing a digital business, including online marketing and product validation.

### Project-Based Virtual Intern : Frontend Core Initiative x Rakamin Academy

*Mei 2025 - Juni 2025*

I participated in a one-month Project-Based Internship as a Frontend Developer with Rakamin and Core Initiative. I learned Vue.js, CI/CD, deployment, and communication and teamwork skills. The project completed with an average score of 81.18 and an "Excellent" grade, giving me real-world experience that meets industry standards.
